Jim Doyle, Governor
Jack L. Fischer, A.I.A., Secretary

Wisconsin Department of Commerce, Bureau of PECFA Bid Document

SECTION 1 - Scope of Work

The Bureau of PECFA is seeking competitive bids to perform remedial services for a petroleum release from a regulated petroleum product storage tank system. This bid is for a specified work scope. The site upon which bids are being solicited is:

Bid Round: 54
Comm #: 54812-1545-08-A
BRRTS #: 03-03-191432
Site Name: Barron Coop Full Service
Site Address: 8 S 4th St , Barron, 54812
Site Manager: Bill Schultz
Address: 107 Sutliff Ave
City, State Zip: Rhinelander, WI 54501-3349
Phone: 715-365-8965
e-mail: bill.schultz@wisconsin.gov
Bid Manager: Will M. Myers
Address: P.O. Box 8044
City, State Zip: Madison, Wisconsin 53708-8044
Phone: (608) 261-7718
e-mail: Will.Myers@Wisconsin.Gov

Bid-Start Date:	April 07, 2008
Questions must be received by (See Section 2 (B)):	April 21, 2008, 4:00 PM
Responses will be posted by (See Section 2 (B)):	May 09, 2008
Bid-End Date and Time:	May 23, 2008, 4:00 PM

The case file, including report(s) and other pertinent information upon which bids are being sought, are available for review at the Site Manager's location listed above. Please contact the Site Manager for an appointment to review the file.

Copies of report(s) and other pertinent information are available for purchase at the location listed below. If pertinent information is not available, please contact the Site Manager.

The Copy Shop-Ashland, 310 Stuntz Ave, Ashland, WI 54806
Phone: (715) 682-6567 Fax: (715) 682-6551

SECTION 2 – Site-Specific Bid Requirements

General Comments

The site is located at 8 South 4th Street, Barron, Barron County, Wisconsin. The site investigation included the installation of 12 monitoring wells and three piezometers at the site. In addition three monitoring wells (CW-1, CW-2, CW-3) from the adjacent closed PECFA SSG Auto Stop site investigation were retained for use in this site's monitoring. Free product was found in five of the monitoring wells at levels as high as 22 inches (in MW-10).

The site was placed into Round 22 of PECFA Bidding. Seventy-three tons of soil was excavated from the site. Contaminated soils greater than NR 746 Table 1 values remain because of building structures and utilities in the area. Free product was hand bailed from MW-1, MW-2 and MW-8.

Minimum Remedial Requirements

Schedule and supervise a laser induced fluorescence (LIF) survey for this site. A grid shall be established on site of twelve points. Three equally spaced points will be advanced with the first point being just East of the B3 boring location but not in the alley. The next two points will be space equally and in line with East wall of the building where the third point is in line with the North wall (front) of the building. The remaining nine points will be a rectangular shape of three by four points. The four points shall run East-West parallel with USH 8 and be in echelon of three. The first rank of three will be in line with the three points advanced between the building and the alley, with the most distant point being adjacent to MW-1, completing a line of six points. The next three ranks will be spaced approximately twenty-feet to the West of the previous rank with each point in-line with the others. See figure #1

Analyze the results of the LIF survey with the end product being a map (horizontal extent), two cross-sections (vertical extent) and a volume of free product. The two cross-sections should be as close to perpendicular as possible. This map and the cross-sections should indicate the difference between heavy petroleum (diesel and fuel oil) and light petroleum (gasoline) if it is possible. The volume assessment should be separated by type if the data warrants it. The horizontal map should be detailed enough to observe building locations, streets, highway, and approximate property lines.

While conducting the survey, four soil samples shall be taken from two borings. Each sample shall be analyzed for grain size with particular attention to the content of fines (silt and clay). The samples shall be collected from the four to six foot range and the second from the fourteen to sixteen foot range. The locations are highlighted on figure #1. Sample results shall be presented in the final report in a tabular or spreadsheet format.

Schedule and conduct two quarterly rounds of ground water monitoring. Collect samples from all wells associated with this site and CW-1 and CW-2 (wells associated with the property adjacent to the East). Samples shall be analyzed for petroleum volatile organic compounds (PVOC). If free product is present in a well measure the product thickness and a depth to groundwater, but do not take a dissolved phase groundwater sample. Groundwater sampling results shall be included in a tabular format and include all historic sampling results. Free product

measurements shall be included in a tabular format and include all historic free product measurements.

Collect two free product samples for quantitative fluid property analyses; density (gm/cc) using ASTM D1481, viscosity (cp) using ASTM D445, interfacial tensions (dyne/cm) using ASTM D971 for the following three pairs: air/water, air/free product, and free product/water. One sample shall be collected from MW-1 and from MW-2. Since data will be input into a free product recovery calculator, all units must be reported out as indicated above.

Within 60 days the work above referenced work is completed, a final report shall be submitted to both the DNR Project Manager (Bill Schultz) and the DCOM Project Manager (Will Myers). The report shall contain at a minimum a detailed description of work performed and results obtained. The volume assessment shall include a summary of calculations performed.

SECTION 3 - Reporting Timeframes

Within *60 days* of the Commerce notification of the maximum reimbursement amount, the responsible party (RP) must execute a written contract with one of the firms that submitted a bid. Failure to execute the written contract within this time will result in ineligibility of interest expenses incurred from the date of the reimbursement cap letter until a contract is executed and work commences at the site. Work must commence within *45 days* of signing a contract. There are specific reporting requirements in Comm 47.70 to monitor the progress of activities at each bid site and there may be additional reporting requirements outlined above. The consulting firm that is contracted to complete the scope of work is required to report the progress of this site to Commerce electronically on the web site at each of the following points:

1. Within fourteen days of executing or terminating a contract with the RP.
2. Three months after entering into the contract with the RP.
3. Twelve months after beginning the work in the successful bid, unless the project is completed before that time (point 6 applies).
4. Twelve months after submitting the previous report (point 3), unless the project is completed before that time (point 6 applies).
5. No later than 10 days after encountering a change in circumstances (the list of circumstances is in Comm 47.70 (3)).
6. No later than 30 days after completing the work.
7. As directed by Commerce.

If Commerce determines that the consulting firm is failing to make adequate progress to complete the scope of work, Commerce will notify the RP and may reduce the reimbursement to accurately reflect the work completed.

Claim Submittal

A claim must be submitted to Commerce within 120 days of submitting the report described in *Reporting Timeframe, point #6*. If a claim is not submitted by the deadline described above, interest costs from the date the report (point #6) is submitted to the date the claim is received will not be reimbursed to the claimant. The claim preparation cost must be included in the Total Bid Amount and is considered within the reimbursement cap.

Questions and Answers

Questions, answers and interpretations will be considered an amendment of this solicitation. All questions must be submitted in writing (fax and electronic mail submittals are acceptable) to the Bid Manager identified in Section 1 of this solicitation. All answers and interpretations shall be in writing from the Bid Manager. Neither the PECFA program nor Commerce shall be legally bound by any amendments or interpretations that are not in writing. Bidders are not to contact other personnel located within the Department of Commerce/Bureau of PECFA concerning the site or the bid solicitation between the Bid Announcement Date and Bid End Date. No further questions will be addressed after the deadline for submitting questions identified in Section 1.

SECTION 4 - Conditions of Bid

The successful bidder will be the entity that complies with all provisions of the bid and provides the lowest total cost, excluding interest, for the site-specific bid requirements described in Section 2. In preparing the bid, the bidder must assume compliance with all applicable codes, including, but not limited to, §Comm 46, §Comm 47, and §NR 700 Wis. Admin. Codes.

The bid Commerce selects to determine the least costly method of remedial action will be the least costly qualified bid. Commerce will rank the bids solely on the basis of cost. Evaluation of bids will continue until the least costly qualified bid is identified. Submittals from an individual or firm during their period of disqualification from bidding, submittals received late and for submittals without a certified commitment (performance assurance and/or signature) will not be considered as bids. Commerce may disqualify a bid for the following reasons:

- Requirements of the bid specifications have not been met.
- The remedial strategy is not appropriate to the geologic setting.
- A Total Bid Amount is insufficient to fund the activities described in the bid specifications.

Commerce reserves the right to reject any and all bids.

Any proposed technology or methods used in the remediation must be allowed for use in the State of Wisconsin and approvable by the agency with jurisdiction (Natural Resources or Commerce).

The bidder Commerce intends to select may be required to provide input to and attend a meeting with the PECFA program and the claimant to explain the bid and remedial approach.

If a bid is disqualified, Commerce will provide written notification to any individual or firm that submitted a disqualified bid. The notification shall specify the reasons for the disqualification, and inform the individual or firm of their right to protest or appeal the decision. If a bid is more costly than the bid Commerce intends to select, the bid will not be reviewed.

The *Notice of Intent* will identify the least costly bid, disqualified bid(s) and bid(s) not reviewed. The *Notice of Intent* will be sent to the RP and will be posted on PECFA's Internet Web site.

SECTION 5 - Instructions to Bidders

Between the bid start and end dates, bidders shall not discuss or attempt to negotiate any aspects of the bid with the RP, other potential bidders or program staff without prior approval of the Bid Manager identified in Section 1. Infractions will result in rejection of the violator's bid and may result in a formal complaint being filed with the Department of Regulation and Licensing.

If access to the site is necessary for the preparation of a bid, access shall be arranged through the Bid Manager. If the Bid Manager is not able to arrange site access, this will not delay the bid process nor negate the comparison and selection from among the bids submitted. All costs associated with a site visit or preparation of a bid will be the bidder's responsibility.

The Bidding Process must conform to the following:

1. The Bid Response shall address all the site-specific bid requirements identified in Section 2.
2. The total bid amount to accomplish the stated goal must include all fees, reporting costs, pre- and post-closure costs and costs for establishing restrictions or institutional controls, when applicable (interest costs are excluded).
3. The submittal must include a copy of the Bid Response document signed by a Professional Engineer, Professional Geologist, Hydrologist or Soil Scientist licensed by the State of Wisconsin. The appropriate registration number of the professional license must be included. Registration requirements are listed in Comm 5.
4. Bids *cannot* be faxed or sent electronically (email) to the program. Documents received by fax or email will not be considered.
5. Bids, amendments thereto or withdrawal requests must be received by 4 pm on the bid end date.
6. The consulting firm's name must be included and all pages of the Bid Response.
7. All costs must be printed (ink, typewritten or computer). Errors must be crossed out, corrections entered and initialed by the person signing the bid. Correction fluid is not allowed. No bid shall be altered or amended after the time specified for the bid end date.
8. Each bidder shall fully acquaint themselves with conditions relating to the scope and restrictions attending to the execution of the work under the conditions of this bid. The failure of a bidder to acquaint themselves with existing documented conditions shall in no way relieve any obligation with respect to this bid.
9. All amendments to and interpretations of this bid shall be in writing from the Bid Manager. Neither Commerce nor the program shall be legally bound by any amendment or interpretation that is not in writing.
10. This bid is intended to promote competition. If the language, specifications, terms and conditions, or any combination thereof restricts or limits the requirements in this bid to a single source, it shall be the responsibility of the interested bidders to notify the program in writing so as to be received five days prior to the opening date. The bid may or may not be changed; however a review of such notification will be made prior to award.

SECTION 6 - Bidder Disqualification

Commerce may disqualify from public bidding any individual or firm that has committed any of the following (Comm 47.67 (1) (a)):

1. Failed to complete the scope of work within the reimbursement cost cap established through public bidding.
2. Failed to complete the scope of work in a bid in a timely manner.
3. Failed to follow DNR rules on the bid project.
4. Received one or more notices from Commerce under s. Comm 47.62 (2) that assess the financial management of an investigation as unacceptable.
5. In any prior occurrence that has been publicly bid, failed to do either of the following:
 - a. Pay subcontractors after receiving payment for them.
 - b. Obtain lien waivers on or before the date of the final payment by the RP or the PECFA program, from all subcontractors paid under subd. 5. a.
6. Failed to execute a contract with the RP as required in s. Comm 47.69 (1).
7. Failed to commence work within 45 days after executing a contract, as required in s. Comm 47.69 (3).

Commerce may disqualify any individual or firm from performing further work on a project if the individual or firm has not completed any of the six reporting points required in Comm 47.70 and outlined in Section 2 of this bid document. Commerce will review and address the issue as stated in Comm 47.70 (4).
